

Afstem reaktionsskemaerne. Brug vejledningen nederst på siden.

Sådan afstemmes reaktionsskemaer:

- 1) Opskriv det ikke-afstemte reaktionsskema.
- 2) Tæl atomer før og efter reaktionen.
- 3) Afstem grundstoffer, der kun er i én reaktant og i ét produkt.
- 4) Tæl atomer igen. Stop her, hvis skemaet er afstemt.
- 5) Ellers justeres de grundstoffer, der er i flere reaktanter/produkter.
- 6) Tjek, at det nu går op.
